

## Climate and Sustainability Position Statement

Through strong relationships, built on trust, Verbrec enables a sustainable future for our clients and their customers.

Verbrec recognises the urgency of reducing emissions and working with our clients to meet their net-zero goals.

We unreservedly support the Paris Agreement goal to hold the increase in the global average temperature to well below 2°C above pre-industrial levels and to pursue efforts to limit the temperature increase to 1.5°C above pre-industrial levels.

We believe we have a responsibility, through our delivery, to proactively support our clients in reaching their sustainability goals and create lasting positive impacts on our communities.

### Our Commitment

To meet our objectives, Verbrec will:

1. Act in a manner consistent with our Sustainability & ESG Policy.
2. Actively reduce our carbon footprint.
3. Actively pursue an increase to the proportion of our revenue linked to sustainable projects in our sustainable focus areas, including Electrification & Energy Storage, Gas Market Transition and Sustainable Mining.
4. Leverage the depth and breadth of our capability to provide innovative sustainable solutions to our clients to enable their net-zero aspirations.
5. Foster partnerships with innovators and technology owners to bring solutions to life and support establishment of cutting edge technologies into the Australian market.
6. Continue to educate our people and support sustainable initiatives throughout our business.
7. Provide concise and transparent reporting on our progress, based on a culture of continuous improvement, aligned with regulation and the United Nations Sustainable Development Goals.
